

## FXCG Downloads

Steps to import programs and eActivities to your Casio fx-CG Manager.

1. Download items from website such as [charliewatson.com/fxcg/](http://charliewatson.com/fxcg/) by clicking on link - item will automatically be saved in your downloads folder.
2. Start the emulator and open the Memory app. Tap [F3] (PC), [F1] (Import), find the folder with the item you want to import and select it.

3. Tap Open and then tap [F1] (Save), followed by [EXIT] when prompted.
4. Tap [F2] (STRGMEM) and find the item you just imported, then tap [F1] to select it.
5. Finally, tap [F2] (COPY) and the Manager will copy the item into Program (if it's a program) or eActivity (if it's an eActivity), etc. Tap [EXIT] when prompted and you're ready to go to the app and use you imported program or eActivity.
